

Lighthouse Maintenance - 2022

In order to look their best for the 150th birthday celebration, the Lighthouse and Keeper's Dwelling received special attention. The tower was gently washed to remove pollen, mildew, and other stains. Exterior metalwork of the gallery at the top of the lighthouse was treated for rust where needed and repainted. The front porch of the Keeper's Dwelling, which welcomes over 50,000 visitors each year, was carefully repaired and painted.

Also, the Oil House was refreshed with two coats of lime-based whitewash, a reversible solution much like that used by lightkeepers.
