Lighthouse Tower and Keepers Dwelling – Early 2025

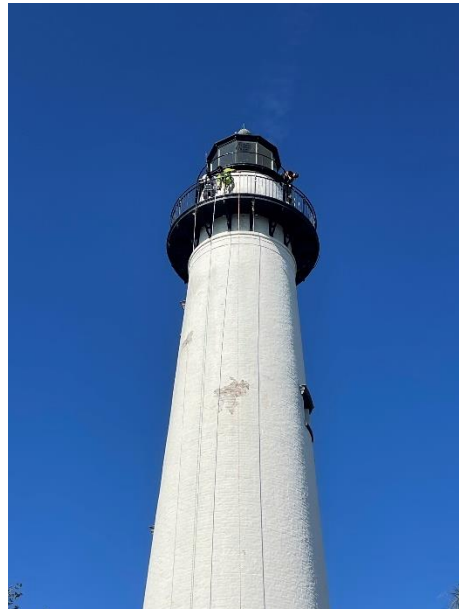

Repaired Lighthouse Tower

The Lighthouse and Keeper's Dwelling are rejuvenated after the completion of exterior maintenance projects in March 2025. Razorback LLC prepared and painted the Lighthouse observation deck and handrail, as well as the lantern room deck and exterior handrail, in addition to washing, repairing, and painting the exterior masonry. Coastal Coverage Painting & Design Inc. painted the Keeper's Dwelling porch and benches, windows, shutters, soffits, and corbels. In addition to a refreshed aesthetic, repairing and painting helps protect these buildings from the harmful effects of our coastal weather. This kind of work is made possible through the Preservation Fund, which ensures that our beloved historic structures are preserved for future generations.

Workers suspended from the tower during repairs.
